

# The final dot in your paperless lab

Epiatech is a software development company providing services to IT divisions and QA/QC departments of pharmaceutical, biotech and chemical companies. Our software engineering team has more than 15 years of experience in laboratory informatics with an emphasis on LIMS systems.

## LIMS Data Management

Our solutions automate demanding LIMS data extractions, complex processing and reporting. We turn raw data into meaningful, cleanly presented reports.

**Improve your data quality and lab efficiency with automation!**

## System Integration

Integration of LIMS with other systems (Content Management Systems (ECM), ERP, MES, LES, etc.) by implementation of direct interfaces or by utilizing industry standard interfacing platforms.

**Connect systems from different vendors with ease!**

## Custom Software Development

We specialize in developing LIMS satellite modules - vendor independent LIMS extensions that automate specific customer processes. A good example is our Stability module which is used for stability testing in R&D and QC labs of a major global pharmaceutical company.

**Let our team translate real lab needs to fully functional software solutions!**

## Recognized by leading players

Epiatech has a proven history of successful projects with significant value added to various parts of lab automation processes. Our flexibility, agility and competitive pricing is recognized by several leading global pharmaceutical companies and industry vendors.

**Join our satisfied customers!**
